

FEATURE 1: DESTINATION SUGGESTION								
Selected US?	No.	Title	Priority	User Story	Acceptance Criteria	Business Rules	Note	Questions
No	US 1	Use Autocomplete for search field	Medium	As a user, I want location autocomplete suggestions while typing so I can quickly select the correct city or country.	1. Type at least 2 characters to trigger location suggestions. 2. See up to 5 matching city/country suggestions while typing. 3. Select a suggestion to confirm the intended location. 4. See the selected location displayed in the search box after selection.		Use OpenTripMap Geocoding API -> lat/ing	
Yes	US 2	Search by city/country	High	As a user, I want to search for a city or country by name so I can discover destinations to visit.	Precondition: - User completes location selection in US1 AC: 1. Enter at least 1 character into the search input to start searching. 2. See a list of matching city and country results based on the entered text. 3. See both city and country names clearly labeled in the results. 4. Select a city or country from the search results. 5. View the selected city or country as the active search value. 6. Receive a message "No attractions found" when no matching locations are found. 7. Clear the search input to start a new search.	- Search results must include cities and countries. - Results should be ranked by relevance (exact matches first). - The maximum number of results displayed is 5. - Duplicate locations must not appear in the result list. - Search is case-insensitive. - Partial matches are allowed (e.g. "Lon" -> "London").		
Yes	US 3	View recommended attractions list	High	As a user, I want to see a recommended list of attractions so I can decide what to explore.	1. View a list of attractions after submitting a valid location search. 2. See each attraction name in the list. 3. See each attraction category/tags when available. 4. See each attraction rating/popularity indicator when available. 5. See a thumbnail image when available. 6. See a placeholder when image or rating is unavailable. 7. See pagination and load more attractions when reaching 20 items. (optional)	- Fetch attractions using coordinates + radius/bounds - Default radius: + City: 20 km + Country: use a broader approach (MVP option: show "top attractions" by major cities or require city selection) - Return max 20 items per page - Use provider ranking and/or internal scoring (e.g., popularity/rate first)	Call OpenTripMap for POIs near that city center Call Foursquare to enrich with categories and reviews What to shown on UI needs to be reviewed based on what we get in response	
No	US 4	Filter recommended attractions	Medium	As a user, I want to filter attractions so I can find places matching my interests.	1. Apply category filters to narrow the attraction list. 2. Apply rating/popularity filters to narrow the attraction list. 3. Combine multiple filters at the same time. 4. Clear filters to return to the full attraction list.	- Support filters (MVP): (will review) + Category (from provider tags/kinds) + Rating/popularity (if available) - Allow multiple filters at once - Keep filters applied when navigating upon pages-		
No	US 5	Sort attractions	Low	As a user, I want to sort attractions so I can prioritize what matters to me.	1. Sort attractions by recommended order by default. 2. Sort attractions by highest rating/popularity when selected. 3. Keep applied filters when changing sort order. 4. See results update immediately after changing sort.	- Support sorting (MVP): (will review) + Recommended (default) + Highest rating/popularity (if available)		
FEATURE 2: DESTINATION DETAILS								
Yes	US 1	Open a destination details view	Medium	As a user, I want to open destination details so I can see more information before adding it to my trip.	1. Select a destination from the list to open its detail view. 2. View the destination name, category, and short description. 3. View images of the destination when available. 4. View the destination location on a map. (optional) 5. View additional information such as address, opening hours, and website when available. 6. Identify an option to add the destination to a trip. 7. Close the destination detail view and return to the previous list.	- Destination details must match the selected destination exactly. - If some data fields are missing, the detail view must still open. - Images and maps are optional and shown only when data is available. - The "Add to Trip" action must be unavailable/unclickable if the user is not logged in.	Fetch details by provider place ID (e.g., OpenTripMap xid or Foursquare)	
Yes	US 2	View photos in destination details	Medium	As a user, I want to see photos of a destination so I can judge if it's worth visiting.	1. View destination photos when available. 2. Swipe through multiple photos when available. 3. See a placeholder when no photos are available.	- Show at least 1 image if available; otherwise show placeholder		
No	US 3	View map and location info	Low	As a user, I want to see the destination on a map so I understand where it is.	1. View the destination on a map with a marker. 2. Zoom and pan the map to explore nearby areas. 3. View an address/area label when available.			
Yes	US 4	View opening hours when available	Low	As a user, I want to see opening hours (when available) so I can plan the right daytime.	1. View opening hours when they are available. 2. See "Opening hours not available" when the data is missing.			
FEATURE 3: TRIP PLANNER								
Yes	US 1	Create a trip	High	As a user, I want to create a trip so I can start planning an itinerary.	1. Create a new trip by entering a trip name. 2. View the new trip in my trip list. 3. Open the trip planner after creating the trip.	- Trip name is required		
Yes	US 2	Set trip start and end dates	High	As a user, I want to set trip dates so the planner creates the correct number of days.	1. Set a trip start date. 2. Set a trip end date. 3. View one itinerary day created for each date in the selected range. 4. See itinerary days update when changing trip dates. 5. Confirm date changes when reducing days would remove planned items.	- Require start date ≤ end date		
Yes	US 3	Add a destination to a trip	High	As a user, I want to add one or more destinations to a selected trip so I can collect places for that trip before scheduling them by day.	1. Add a destination to a trip from the attraction list. 2. Add a destination to a trip from the destination details page. 3. Select a day in the trip. 4. See the destination appear immediately under the selected trip.		Yes, Please update to include select a day in the trip like the node in US4.	
No	US 4	Schedule destinations into a day in trip	Medium	As a user, I want to drag and drop destinations into a specific day so I can quickly build a day-by-day itinerary.	Preconditions: - Have a trip created - Set trip start and end dates (days exist) - Have at least one destination in Saved Places AC: 1. Drag a destination from Saved Places and drop it into a selected day. 2. See the destination removed from Saved Places after dropping. 3. See the destination appear immediately in the selected day. 4. See a message when dropping a destination into a day where it already exists. 5. See the destination return to Saved Places when the drop action is invalid.	- Remove destination from Saved Places after successful drop - Prevent the same destination from being scheduled twice in the same day	If not implement this feature, in the US3, users must select a day in the trip	
No	US 5	Reorder destinations within a day	High	As a user, I want to reorder destinations within a day so I can control the visit sequence.	1. Drag a destination within a day to change its position. 2. See the new order saved automatically. 3. See the updated order preserved after refreshing the page.			
No	US 6	Drag a destination from one day to another	High	As a user, I want to move a destination from one day to another so I can reschedule easily.	1. Drag a destination from one day and drop it into another day. 2. See the destination removed from the original day. 3. See the destination appear in the new day. 4. See a message when dropping a destination into a day where it already exists. 5. See the destination remain in the original day when the drop is invalid.			
Yes	US 7	Remove a destination from the itinerary	High	As a user, I want to remove a destination so I can keep my itinerary accurate.	1. Remove a destination from a trip day. 2. See the destination removed immediately after confirmation.			

Yes	US 8	Require login to save trips and destinations	Medium	As a user, I want to be prompted to log in when saving trips so my destinations are stored in my account.	1. Browse destinations without logging in. 2. Prompt me to log in when I try to create a trip while logged out. 3. Prompt me to log in when I try to add a destination to a trip while logged out. 4. Return me to the same trip/destination after logging in. 5. Complete the original save action after successful login.			
No	US 9	Save trips and destinations automatically to my account	Medium	As a user, I want my trips and selected destinations to be saved automatically so I can come back later and continue planning.	1. Create a trip and see it remain available after closing and reopening the app. 2. Add a destination to a trip and see it remain in the trip after closing and reopening the app. 3. Remove a destination from a trip and see it remain removed after closing and reopening the app. 4. Edit trip details (name/dates) and see the updates persist after closing and reopening the app. 5. See a saving indicator when changes are being saved. 6. See an error message when saving fails and keep my unsaved changes locally until retry.			
Yes	US 10	Load my saved trips and destinations when I return	Medium	As a user, I want the app to load my saved trips and destinations when I return so I can continue where I left off.	1. Log in and see my previously created trips. 2. Open a trip and see previously saved destinations and itinerary days. 3. See an empty state when I have no saved trips.			
FEATURE 4: USER AUTHENTICATION								
Yes	US 1	Sign up with email and password	Medium	As a user, I want to create an account so I can access the app with my own identity.	1. Open the sign-up screen. 2. Enter an email address and password. 3. Create an account when the email is not already registered. 4. See a message when the email is already registered. 5. See a message when the password does not meet requirements. 6. Continue to the app in a signed-in state after successful sign-up.	- Require unique email per account - Enforce password policy (MVP): min 8 chars - Store passwords using strong hashing (e.g., bcrypt/argon2) - Send generic error messages to avoid account enumeration		
Yes	US 2	Verify email to activate account	Medium					
Yes	US 3	Log in with email and password	Medium	As a user, I want to log in so I can access my account.	1. Open the login screen. 2. Enter an email address and password. 3. Sign in when credentials are valid. 4. See a message when credentials are invalid. 5. Stay signed in after refreshing the page.			
Yes	US 4	Log out	Medium	As a user, I want to log out so I can end my session.	1. Click the "Log out" option. 2. End the session immediately. 3. See the app return to a logged-out state. 4. Prevent access to pages after logging out.			
NON-FUNCTIONAL REQUIREMENTS								
Yes	NFR 1	Search Performance	County/City search results should be returned within ≤ 500 ms for 95% of requests.					
	NFR 2	Search Performance	The attractions suggestion should be displayed within ≤ 1000 ms for 95% of requests.					
	NFR 3	Loading Time	Destination details popup must be displayed within ≤ 2 seconds after the user opens the detail popup.					
	NFR 4	Responsiveness	Drag-and-drop actions (assigning destinations to days) must respond within ≤ 100 ms without visible UI lag.					
	NFR 5	Data Scalability	The system must handle millions of destination records from external APIs.					
Yes	NFR 6	Authorization	Users can only view and modify their own trips and saved destinations.
